## Sustainability

### Humanitarian Projects

#### Project planning

Describe the community needs that your project will address.

1. Satisfy the safety concerns that commuters/travelers may have at the train or bus stations.

2. According to a survey made by the Global Views Monthly, 69% of TaiChung city civilians concern the numbers of SED's currently being put up for services are far less than required.
3. In October 2014, Rotary Club TaiChung took a field investigation to verify the current status of AED service availability at certain major city spots. There is only one AED at TaiChung railway station and another one on the DaKeng hiking trails. AED facilities are indeed not enough for necessary requirement.

**How did your project team identify these needs?**

**How were members of the benefiting community involved in finding solutions?**

**How were community members involved in planning the project?**

1. The related administrative officials all welcome this project. They will provide proper locations within their area to host the AED's and arrange two or more staffs to attend the 'CPR+AED' trainings to become dedicated personnel to manage and operate the AED's.
2. Both TaiChung railway station and the temple sit midway of the DaKeng hiking trail each have only one AED respectively by now. Considering every day more than 50000 people making transportation at the station and nearly 2000 people going up and down along the hiking trail, the station and temple have long felt they need more AED's to provide adequate safety services. Therefore the purpose of this project would serve as a perfect addition to their service that is going on every day for the time being.

**Will you work in coordination with any related initiatives in the community?**

**Please describe the training, community outreach, or educational programs this project will include.**

**How were these needs identified?**

**What incentives (for example, monetary compensation, awards, certification, or publicity), will you use, if any, to encourage community members to participate in the project?**

**List any community members or community groups that will oversee the continuation of the project after grant-funded activities conclude.**

**Budget**

**Will you purchase budget items from local vendors?**

**Did you use competitive bidding to select vendors?**

**Please provide an operations and maintenance plan for the equipment or materials you anticipate purchasing for this project. This plan should include who will operate and maintain the equipment and how they will be trained.**

**Describe how community members will maintain the equipment after grant-funded activities conclude. Will replacement parts be available?**

These spare and replacement parts can be readily available and bought from the company. The vendors will provide a training course of CPR+AED for the cooperating organizations to properly operate the equipment.

**If the grant will be used to purchase any equipment, will the equipment be culturally appropriate and conform to the community's technology standards?**

**After the project is completed, who will own the items purchased by grant funds? No items may be owned by a Rotary district, club, or member.**

The items purchased with grant funds at the end of the project will be owned by the cooperating organizations.

**Funding**

**Have you found a local funding source to sustain project outcomes for the long term?**

**Will any part of the project generate income for ongoing project funding? If yes, please explain.**
